## (54) DISCRIMINATING DEVICE OF BILL COUNTING MACHINE

## (57) Abstract:

PURPOSE: To select adequate line data corresponding to the form of bill by newly providing a means which selectively takes out the surface pattern of the bill as plural line data.

CONSTITUTION: The surface pattern of a bill is selectively taken out as plural line data by a selecting means 46, etc. Further, when a data selecting means 46 specifies denomination, reference data on four front and rear, and normal and reverse patterns and to a specified denomination are selected. When no denomination is specified, reference data on 4×L patterns in total which are four front and rear, and normal and reverse patterns each of L denominations are selected as to one bill, and reference data on four front and rear, and normal and reverse patterns of the denomination based upon denomination information on the 1st bill are selected for 2nd and succeeding bills, so adequate reference data can be selected according to the forms of the bills.

## LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's  
decision of rejection]

[Date of requesting appeal against  
examiner's decision of rejection]

[Date of extinction of right]
